PROGRAMMING TECHNIQUE

## Stick to Convention: Simplify The Naming of Controls

Automatically apply the Leszynski-Reddick  
naming standard to form controls with this  
handy utility.

By Christopher R. Weber

### About this Article:

This article presents a  
form (included with CRD  
file) that automatically  
applies Leszynski-Reddick  
naming conventions to all  
controls included on a  
form under development.  
Remember that because  
the utility only uses code-  
behind-forms, you can  
import it into your  
databases without  
worrying about using  
additional memory  
resources. It will save  
time.

**PRINT ONLY:** This  
article is not available  
online.

You can read the  
complete article in the  
print edition of  
**ACCESS-VB-SQL  
ADVISOR**. To start  
your subscription, buy  
an annual compilation  
CD, or buy the print  
issue this article  
appears in, go to
